

Thank you for participating in the National Dementia Workforce Study.

This survey is sponsored by the National Institute on Aging and is being given to assisted living community staff who care for people living with dementia. The survey should take about 25 minutes.

Your responses are confidential and will never be shared with your employer.

Dementia is a general term for a condition causing loss of memory, language, problem-solving, and other thinking abilities that are severe enough to interfere with daily life. Alzheimer's disease is the most common cause of dementia.

General Information

Topic: The University of Michigan and the University of California, San Francisco are conducting a study to learn more about healthcare workers who provide care to persons living with dementia. RTI International has partnered with the study team to deliver this survey to assisted living staff such as yourself. To get information, we'd like 4,400 people to answer a survey. We expect it to take about 25 minutes to complete the survey.

Voluntary: Answering this survey is voluntary. You don't have to answer it if you'd rather not. You can skip any questions that you don't want to answer, whatever the reason, and you don't have to tell us why.

Risk: It's possible that some of the questions may make you feel uncomfortable. If a question makes you uncomfortable, you can just skip it and go to the next question. Although unlikely, there is always a risk of breach of confidentiality.

Confidentiality: To keep your information as confidential as possible, we will label your survey with a code, rather than your name or any other details that researchers could use to identify you. All published data will remain de-identified, which means all information that could be used to identify you will be removed (for example, your name).

Benefit: Answering our survey won't benefit you directly. We hope what we learn will help improve the quality of dementia care in the future.

Data Sharing: Funding for this study is provided by the National Institute on Aging (NIA) of the National Institutes of Health (NIH). Your de-identified survey data will be combined with data collected from other participants and stored in a NIH data repository. The de-identified survey data will be used for future research studies without additional informed consent.

Your de-identified survey responses may be combined with responses about the organization where you work. All of the data will be de-identified and will not include your name or the name of the organization where you work. You cannot be identified from the survey responses you provided.

NIA has partnered with the University of Michigan to manage and store the de-identified data from your survey responses. In the future, the NIA may transfer the management of the study data to another institution.

Compensation: To thank you for taking part in our study, we'll send you [FILL1] after you take the survey. You will be asked for your name and address in order to receive your incentive. This information will be kept separate from your survey responses.

By completing this questionnaire, you confirm that you have read and understand the consent, **are 18 years or older**, and are willing to voluntarily take part in this study.

INSTRUCTIONS

Answer all of the questions by completely filling in the circle to the left of your answer, like this:

- ☒ Yes
☐ No

You are sometimes told to skip over some questions in this survey. When this happens, you will see an arrow with a note that tells you which question to answer next, like this:

28. During the past month, did you miss any time from work because of problems with transportation?

☐ Yes
☐ No → Go to #31

→ 29. During the past month, how many shifts did you miss because of transportation problems?

Number of shifts

In this example, if you answer “Yes” to Question 28, you should continue to Question 29.

If you answer “No” to Question 28, you should skip to Question 31.

THANK YOU

Thank you for participating in the National Dementia Workforce Study. We will conduct a follow-up study in 2025 and would like to invite you to participate. Learning about how your experiences change over time will help provide a better understanding of the challenges and opportunities faced by the dementia care workforce.

When we do the study next year, we would like to reach you directly.

78. Please provide your first and last name so that we can contact you directly when we launch the study next year.
